

# Surshield® Safety I.V. Catheter

The ***Sure*** sign  
of first-stick  
success!

**Terumo's innovative catheter is the only one with SurFlash®, our exclusive catheter placement indicator, plus a passive safety feature.**

- Clear visual confirmation of catheter placement, for increased confidence and first-stick success
- Reduced risk of needlestick injury – without adding extra steps to your procedures
- Ultra-sharp, double-bevel needle and medical-grade lubricant for smoother venipuncture

# Surshield® Safety IV Catheter

## Accurate catheterization... superior safety.

### SurFlash® enhanced flashback feature for clear visual confirmation of accurate catheter placement

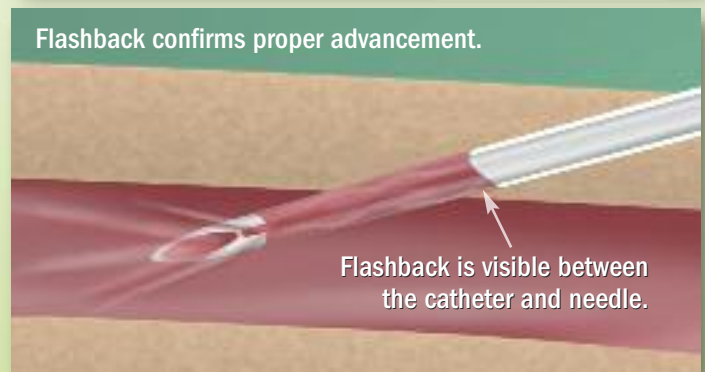

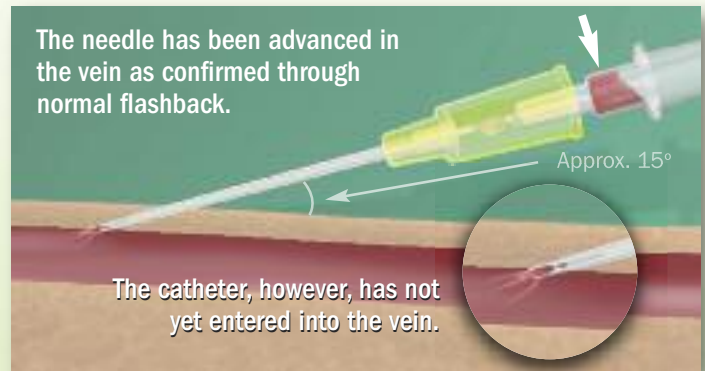

- Increased first-stick success – even in challenging venipuncture situations
- Reduced risk of vein injury
- Fewer wasted catheters
- Enhanced confidence in performing venipuncture
- Improved patient satisfaction

### Passive needle safety

- Reduced risk of needlestick injury
- Easy to use
- Automatic activation – no extra steps needed

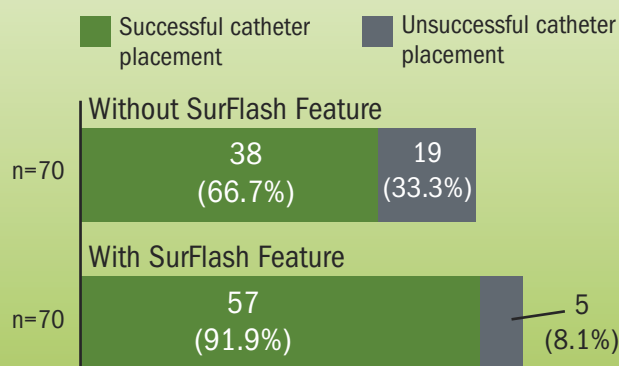

### Ultra-sharp, double-bevel needle with medical-grade lubricant

- Easy insertion and smooth catheter advancement
- Smooth venipuncture
